RULES FOR NON-TITLED OBEDIENCE CLASSES

Winner of Winners

If a Club schedules this class, the schedule must state which class winners are required to compete, either all titled class winners only or titled and non-titled class winners, excluding the veteran class winner.

A dog may be withdrawn before or during judging (any non-titled class) with the consent of the Judge, but must not take any further part in that class.

RULES FOR NOT FOR COMPETITION OBEDIENCE AND RALLY CLASSES (01/20)

This is a non-qualifying class for dogs who have gained a Community Companion Dog or Novice Obedience title or a Novice Rally title.

Dogs may be entered in any class up to and including the highest title gained by the dog but shall not enter a higher class at the same trial.

The class will be judged in accordance with the normal ANKC Ltd Rules and procedures for that class.

1. RULES FOR AGILITY NOT FOR COMPETITION (NFC) Runs (07/21)

1.1. NFC Categories Offered

There are no separate classes, courses, or judges for NFC runs. NFC runs will be undertaken on the relevant competition course within the chosen class. A dog may participate in a NFC run in any Class for which they meet or exceed the requirements.

There are 4 different NFC categories:

- Standard NFC – A dog may be entered into any class and height for which the dog is normally eligible.
- Lower Height / Lower Class NFC – A dog may be entered into any class and/or height that is less than the dog's current competition standard. The exception to this is a dog whose competition height is 200; it must run at 200. A dog cannot be entered in a class that it would not be ordinarily eligible for, or at a jump height higher than its competition height.
- Veterans – A dog may be entered into the Jumping Novice class and must compete at a jump height less than their competition jump height. This category is strictly for dogs 8 years of age or older, who are not competing in any other class at that trial. The dog must have gained a minimum of an Agility or Jumping Novice title.
- Junior Handlers – A dog may be entered into the Agility Novice and/or Jumping Novice class, to be run by a Junior Handler. Junior Handlers must be at least 7 years of age and under 18 years of age and possess a current membership with either the SACA or an Affiliate who conducts Agility training.

1.2. NFC and Competition Class Eligibility

A NFC run in a specific class replaces the dog's competition run in the class for which it is normally eligible. An exception is made for a dog entered under the Junior Handler NFC category.

A handler who elects to undertake a NFC run in either of the Agility Novice, Excellent, Masters, or Elite classes will be excluded from undertaking a competition run in any of those classes in that trial. However, the dog can compete in Jumping and/or any Open classes. Similarly, a dog may run NFC in a Jumping class and still be eligible for competitive runs in Agility classes.

Open classes can be run as NFC. A dog entered in NFC in an Open class will not be excluded from competing in Novice, Excellent, Masters, or Elite in that trial.

NFC runs will be deemed to be Non-Qualifying runs for the purposes of Annual Awards.

A Junior Handler NFC run does not replace or exclude a competition run for the entered dog in any class in that trial aside from Novice Agility or Novice Jumping.

1.3 NFC Rules

All ANKC rules for a Competition apply to NFC with the exception of the following:

- i. Under no circumstances may a Handler who runs NFC qualify or receive qualification certificates. There is no requirement for any prizes/ribbons/rosettes for that Class.
- ii. A Handler may decide on the day to change their entry to Standard NFC. A Handler must advise the Judge that they wish to convert to a NFC run in a particular class by the expiration of the time allocated for walking the course for that class.
- iii. A Handler may not enter the ring for a competition run and then once in the ring change their mind and swap to NFC.
- iv. A Competitor running NFC will only be given time in the ring up to the Standard Course Time (SCT).
- v. Timing for NFC runs will start when the dog negotiates the first obstacle, or as the dog or Handler triggers the timing device. In the case of manual timing, the time will start when the first part of the dog's body crosses the plane of the first obstacle attempted.
- vi. The scribe should not record time or faults for an NFC run. NFC runs should be denoted on the scribe sheet with 'NFC' written next to the competitor number.
- vii. The Handler may choose to repeat an already completed obstacle or sequence of obstacles in a NFC run.
- viii. A Handler may not lift a dog onto equipment.
- ix. The Scribe is to indicate to the Handler that their time is finished at the end of the SCT for an NFC run. At the end of the SCT the Handler should promptly remove their dog from the ring.
- x. Under no circumstances is food to be used in the ring. This includes toys with food inside of them.
- xi. The Handler may use a non-audible toy for rewarding in the ring. Toys must remain in control of the Handler at all times (i.e. must not be thrown or intentionally released).
- xii. NFC runs must not cause distraction to other dogs - in other rings or dogs running before or after that run.
- xiii. The Handler must carry a lead and/or collar during the run.
- xiv. The Judge shall not judge the Handler for Faults or Refusals unless agreed upon at the Judge's briefing.
- xv. The Judge shall ensure safety, good sportsmanship and fair treatment of the dog, and that the Handler is complying with the NFC rules whilst in the ring.
- xvi. Failure to follow these rules may result in the Judge disqualifying the Handler from further competition in that trial.

2. Entering NFC, Schedules and Catalogues

2.1. Schedules and Entries in NFC Categories

NFC Categories may be offered at a trial at the discretion of the Affiliate Member.

For Standard NFC, a Handler may either enter for a NFC run at their dog's normal class and height, or alternatively enter for a Competition runs as directed in the exhibition schedule, and then elect to run as NFC on the day of the exhibition.

The Lower Height/Lower Class, Veterans, and Junior Handler categories must be entered as directed in the exhibition schedule, and the following additional information must be provided:

1. NFC Jump Height
2. Competition Jump Height
3. The class being entered

2.2 Catalogues and NFC Entries

The Affiliate Member will include the pre-nominated NFC entries in the catalogue and allocate them a number prefaced with the letters NFC, 'LH/LC', 'JNR', or 'VET'. The entry will be placed at the end of the class and height nominated.

If a separate height trial is being conducted where different courses are provided for different heights, the dog must run the course designed for that dog's normal competition height, regardless of the jump height selected by the Handler. For example, a dog with a competition height of 500 which has been entered into Lower Height/Lower Class NFC at 400 must still compete on the 500 course, albeit with the jumps set to the 400 height.

AGILITY TRAINING GUIDELINES

FOR INSTRUCTOR IN CHARGE OF TRAINING AND ALL AGILITY INSTRUCTORS (01/22)

FOR PUPPIES FROM 14 WEEKS OF AGE.

General Guidelines for Puppy Agility Training

It is recommended that clubs have the appropriate puppy training equipment before commencing puppy agility classes.

Most puppy classes are held in the evenings and advise the handlers that it would be wise for puppies to have rested prior to coming to a puppy class. The puppy can start training 2 weeks after their final vaccination, recommend that a veterinarian check the puppy before commencing puppy Agility training.

Training a puppy should be FUN, with plenty of positive interaction between puppy and handler. It has to be mentally stimulating. The handler must be the puppies world, with plenty of positive treats and praise, also the puppy should never be allowed to fail, encourage him, but never force him to do anything, remember the majority of puppies are fearless, they will try most things, keep this confidence up. This will lead to a playful and skillful mode for the rest of puppies' Agility years.

When training a puppy on Agility equipment, there must be no impact on its body whatsoever, growing joints are easily damaged. Many years will go into training to become an Agility dog, do not abuse the puppy physically or mentally. Training should not include jumping until the minimum age of 12 months and longer for the larger breeds in consultation with their vet.

When puppies become adult dogs, it is advisable to take them to a veterinarian for a physical checkup i.e. hips, elbows, patella's and eyes.

Training the Agility Puppy

When training puppies, it is very important that you remember four things.

It must be FUN at all times.

Plenty of praise and rewards.

Always work puppies on both sides of the handler and the equipment.

Always keep training sessions short.

Basic Obedience Skills for an Agility Puppy

The Kindergarten Agility puppy should be socialized with friendly people and other puppies in the class along with their owners, instructors and observers. Some basic obedience skills are highly recommended for the puppy before starting puppy Agility training including;

Name recognition

* Sits

* Walking on lead in a nice manner on both sides

* Learn how to handle your puppy

* Recalls

* Drops

These puppy exercises can be taught in a positive manner with plenty of praise, treats and toys.

After the puppy has gained the basic Obedience skills, start on confidence building exercises, introducing puppy to some Agility equipment.

TRAINING WITH CLUB EQUIPMENT

PIPE TUNNEL

A puppy of any age can learn how to go through a piped tunnel (*a puppy tunnel is recommended:- i.e. a tunnel with little or no internal ridges*). Make the tunnel straight and to it's minimum size (making sure it is fixed well) give the puppy to someone to hold at the entrance of the tunnel, the handler goes to the other end, bending down, calling him through with plenty of encouragement and a treat.

To encourage him to go through the tunnel with more confidence, use lots of praise and treats, (this speed will be needed at a later date). You can gradually increase the length of the tunnel but never overpower the puppy with the length of it. When the puppy has gained confidence you can introduce a slight curve a little bit at a time. Remember, never set a puppy up to fail an obstacle, puppy's must always succeed

THE COLLAPSIBLE TUNNEL

The Fabric for this tunnel should be of very light weight such as a fine shade cloth material. When using the tunnel

start with the cloth pushed right up to the solid part of the tunnel. Give the puppy to someone to hold at the entrance of the tunnel, the handler goes to the other end, bending down and calling him through with plenty of encouragement and a treat. Once the puppy gains confidence, extend the collapsible part by ½ a meter, this may take a puppy a few sessions to do or a few weeks, it all depends on how confident he is finally have the tunnel at full length and fully opened so that the puppy can always see you at the exit of the chute. After the puppy has gained confidence with this exercise you can start to gently drop the chute onto the puppy just as it is about to exit the chute. When the puppy has gained confidence you may extend the collapsible part a little at a time. Remember, do not set the puppy up to fail, always remember to give plenty of praise and treats.

DOG WALK

Get the puppy to walk across the dog walk while it is resting directly on the ground, don't forget to give plenty of praise and treats. At this stage, the dog walk looks wide to the puppy, this will help with the larger breed of dog, giving him lots of confidence when he is an adult dog. Raise the platform to a maximum height of 300mm to get some elevation until the puppy is 6 months old, then progressively raise the height as the puppy matures and grows in confidence. *Puppy maturity is to be determined in consultation with the owner and/or their vet. If clubs do not have adjustable dog walks, then it is to remain flat on the ground.* Contact colors can be taught. There are many ways of teaching contacts, make sure they are positive, plenty of praise and treats.

SEE-SAW

A puppy see-saw will have to be constructed; this is not very hard to do. All that is needed is a short piece of PVC pipe 25mm to 40 mm in diameter. One piece of Plywood 300mm wide. Fix pipe just off centre to the plywood. Remember the board should only rock a few millimeters, and controlled at all times so that the puppy is not thrown off balance. With this exercise he gets used to the movement under his feet. Remember do not set the puppy up for failure.

WEAVE POLES

A puppy MUST NEVER do inline weave poles until he is at least 12 months of age for small to medium size breeds and at least 18 months for larger breeds. The poles should be set apart in two lines so that the puppy runs straight through the middle of the poles and does not flex it's spine in anyway. Make sure the handler goes on both left and right sides of the weave poles. With the weave poles you must show a very high amount of enthusiasm, lots of praise and treats, playtime with a toy etc. All of these practices will benefit both the handler and puppy when he starts weaving as an adult dog.

JUMPS

Jumping is not for a growing puppy. Only the basics of jumping are taught to a puppy. This is taught by placing one or two poles on the ground with the jump uprights in place. Start by getting someone to hold the puppy at the start, and then have the handler call the puppy over the poles with plenty of praise and treats or its favorite toy. Have the handler running along side the puppy, and then gradually start sending him ahead of the handler to go over the two ground poles. As the puppy gains confidence and is at least 12 months of age for small to medium size breeds and at least 18 months for larger breeds, the ground poles can be raised a few millimeters. Never go too high as you will do irreparable damage to the growth plates of the puppy. Remember, the puppy will not be jumping at its full height until it is an adult.

GROUND POLES

Place 4 or 5 poles on the ground. They should be introduced to puppies amply and unevenly spaced and the distances and set-ups should be changed regularly. Let the puppy also discover angled poles and recalls do not forget to give puppy plenty of praise. Have the handler walk along the side the bars with the puppy not forgetting to go in both directions. You will see a marked improvement in its walk.

The other exercise that can be done with these poles, is to put them into the shape of a wheel and the handler taking the puppy round the outside of the wheel in both directions, as he gets closer to the centre the puppy will alter its footwork while on the move. When your puppy gains confidence you can alter the design of wheel to make it more interesting by placing more poles in the circle or by taking some out. Remember exercises should go for about 5 or 10 minutes, do not tire your puppy out. It must be fun at all times.

DISTANCE WORK

This is a fun game where the handler sends the puppy away from them. Have the handler place a white jam lid about a meter in front of them, have them show the puppy the treat, and place it on the lid, he will want to get away from the handler to get the treat, as the handler release's him to get the treat, have them use a word like "Go Out", "Out", "Away". After some time, the distance can be increased and also introduce curves. Remember, this fun for both the puppy and handler.

THINK POSITIVE.

Be positive at all times. Never let the puppy have a bad experience on equipment. If you are uncertain about the puppy on a piece of equipment, always err on the safe side and speak to your Instructor in charge of training for advice. **(01/22)**

It is well to remember that a puppy has no fear at this stage in his life, it is a learning experience, he is relying and trusting in all things positive from his handler, and for the negative ones he will experience, he needs plenty of reassurance.
